

**COOPERATION AGREEMENT WAS SIGNED BETWEEN UNIVERSITY OF
TURKISH AERONAUTICAL AND TURKISH AEROSPACE INDUSTRY
INCORPORATION (TUSAŞ-TAI) ON 04.05.2018.**

Turkish Aerospace Industries (TUSAŞ-TAI) is the technology center for the design, development, production, renewal and after-sales service areas of civil and military aircraft platforms that are primarily needed by our country in accordance with the goal that the great leader Ghazi Mustafa Kemal Atatürk showed in his motto: “the future is in the skies.” Therefore, TAI which is in the position of cornerstone of Turkish aerospace industry has become a major player both in Turkey and worldwide with local and national projects. TAI which continues to successfully implement many of the projects available in this mission is also signing important future-oriented projects.

The national projects carried out by the defense industry in our country and the rising civil air transport are rapidly growing in need of qualified labor force raised with academic and practical trainings.

In line with this purpose, University of Turkish Aeronautical Association, which was established to pass on the knowledge, skills, and experiences of Turkish Aeronautical Association established by ATATÜRK to the Turkish youth, takes the contribution of the students to the Turkish aviation sector as a goal. A cooperation protocol was signed between University of Turkish Aeronautical Association, which is the first and only specialization university in the field of aeronautics and space, and TAI on 04.05.2018

Within the scope of the protocol;

- In the intern technician program, it is envisaged that the students who are studying in the program of Aircraft Technology of Ankara Aeronautical Vocational School do internship for at least one day full-time per week.

A fee will be paid to our students in accordance with the principles of the Vocational Education Act, the Directive, the Agreement and the Protocol in return for their participation in the practical trainings at TAI facilities on a certain day / days as part of Workplace Training.
